

SpineTRACK Registry—Qualified Clinical Data Registry (QCDR) Services

The SpineTRACK Registry is designated as a Qualified Clinical Data Registry (QCDR) by the Centers for Medicare and Medicaid Services (CMS) for the 2018 reporting year.

WHAT DOES THIS MEAN?

As required by the Quality Payment Program (QPP), SpineTRACK can submit quality data directly to CMS for the Merit-Based Incentive Payments System (MIPS) on behalf of eligible clinicians participating/actively enrolling patients in the SpineTRACK Registry.

WHO DOES THIS AFFECT?

In 2018, MIPS-eligible clinicians are defined as physicians, physician assistants, nurse practitioners, clinical nurse specialists, and certified registered nurse anesthetists who have **>\$90,000 Medicare Part B allowable charges** or **>200 Part B-enrolled Medicare beneficiaries** (either as an individual or as a collective group).

WHY IS THIS IMPORTANT?

The QPP impacts how Medicare pays eligible clinicians. Your utilization of SpineTRACK can help meet Medicare reporting requirements and help you to qualify for higher payments and avoid a negative payment adjustment in 2020.

2018 MIPS PERFORMANCE

SpineTRACK allows you to collect and report patient-reported measures, independent of your electronic medical records, to meet 50% of the MIPS Performance Score. Each category is weighted and factored into a final MIPS score which affects Medicare payments in 2020 for the 2018 reporting year, $\pm 5\%$ depending on participation. *To learn more about the MIPS program, visit: qpp.cms.gov/mips/overview*

SUPPORTED MEASURES

NON-MIPS (SPINETRACK) MEASURES

- Percent of patients meeting minimal clinically important difference (MCID) thresholds for back or neck pain
- Percent of patients meeting MCID thresholds for leg or arm pain
- Percent of patients meeting MCID thresholds for pain-related disability (Oswestry disability index/neck disability index) (ODI/NDI)
- Percent of patients meeting substantial clinical benefit (SCB) thresholds for back or neck pain
- Percent of patients meeting SCB thresholds for leg or arm pain
- Percent of patients meeting SCB thresholds for pain-related disability (ODI/NDI)

MIPS (CMS-DEFINED) MEASURES

Q# 047, 128, 131, 154, 178, 220, 226, 317, 318, 358, 374, 402, 412, 431

REQUIREMENTS FOR PARTICIPATION

To meet 2018 reporting requirements, SpineTRACK participants must collect patient-reported outcomes, specifically NDI/ODI and visual analog scale (VAS), within SpineTRACK on all patients, not just Medicare patients. All SpineTRACK users are required to sign a Business Associate Agreement and a Registry Participation Agreement for implementation. There is no additional cost for QCDR reporting services.

CONTACT US

To learn more about the SpineTRACK Registry, please visit our website at **nuvasive.com/spinetrack-registry** and download the SpineTRACK Registry Brochure. For questions or information regarding participation in the Registry and/or our QCDR services, please contact NuVasive Clinical Resources by email at **clinicalresources@nuvasive.com**.
